2.5 Purpose of Offer and proposed use of Offer proceeds

The purpose of the Offer is to fund the ongoing R&D activities of the Company and to provide additional working capital for the Company to continue its activities.

It is expected that the Company will receive, from the issue of New Shares, gross proceeds of up to \$7,918,879.

As at the date of this Prospectus, it is proposed that the proceeds of the Offer will be applied as follows:

Proposed expenditure	Amount (\$m)
Clinical programs (including planning and preparation for the DARRT-2 Phase 2b clinical trial in early-2021, completion of the Phase 2a LuPIN-1 trial, and preparation for initiation of a dose-response trial in COVID-19 patients)	5.4
Ongoing development of the pre-clinical pipeline drug candidates	1.0
Costs of Offer (see Sections 5.6 and 5.9)	0.7
Working capital	0.8
Total	7.9

The above expenditure table reflects the intention of the Directors as at the date of this Prospectus, based on the current condition of, and the Board's current plans for, the Company and its business. Please note however that, as with any budget, the allocation of funds may change (possibly to a significant extent) depending on a number of factors, including changes in the scope of planned R&D projects, variations in the cost of laboratory work and clinical trials, variation in cost and number of staff required to undertake R&D and changes in the costs of manufacture, transportation and storage of chemical compounds and drugs. In light of this, the Board reserves the right to alter the way the Company ultimately applies its funds as well as the commercial objectives and priorities of the Company.

It is expected that the Offer will be fully subscribed, whether by Eligible Shareholders or with the shortfall being made up by the Underwriter. However, if the Offer is undersubscribed (and the Underwriting Agreement is terminated) and the Company raises not less than \$4,000,000 (before costs) from the issue of New Shares, the Directors intend to apply the net proceeds of the Offer to undertake prioritised pre-clinical (\$0.8m) and clinical programs (\$2.0m) and with the balance to fund working capital.

Completion of the Offer is not subject to meeting any minimum level of subscription.

The Board considers that on Completion of the Offer the Company will have adequate capital to enable it to carry out its business plans until February 2021. The Company will need to raise additional funding before February 2021 in order to continue implementation of its business strategy after that date.

*The Offer is fully underwritten, so, unless the Underwriting Agreement is terminated, this is the outcome expected by the Company. Please see Section 5.4 for further information.

**Please see Section 5.4 for further information.

(b) Effect on control

The Offer is not expected to have any material effect on the control of the Company as Shareholders are restricted under the Corporations Act from acquiring New Shares that would increase their Voting Power in the Company to a level that is above 20%, unless they make an off-market takeover bid for all of the Shares in the Company or are able to rely on another statutory exception. As at the date of this Prospectus, the Directors are not aware of any proposal by any person to make a takeover bid for the Company.

(i) *Underwriter*

As detailed in Section 5.4, the Underwriter has agreed to fully underwrite the Offer.

The Underwriter has advised the Company that neither it, nor any of its associates, currently has a Relevant Interest in any Shares and will not, as a result of the Offer, have a Voting Power of 20% or more in the Company.

The Underwriter's Relevant Interest in the Company following Completion of the Offer will depend upon the number of New Shares taken up and the number of New Shares subscribed for by sub-underwriters.

Assuming no further Shares are issued prior to the Record Date, the maximum number of Shares the Underwriter will have a Relevant Interest in and its Voting Power will be approximately 5%.

(ii) *Substantial Shareholders*

As at the date of this Prospectus (based on the last Notice of change of interests of substantial holder released to the ASX by each person), the following persons hold Relevant Interests in 5% or more (by number) of the total Shares on issue in the capital of the Company (**Substantial Shareholders**):

Shareholder	Number of Shares before Offer	% Voting Power before Offer
Milligene Pty Limited as trustee for The GE and PR Kelly Fam Trust and its associates*	31,540,756	20.71%
Eleanore Goodridge**	10,628,590	6.99%

*An entity associated with Graham Kelly, a director of the Company. Dr Kelly has advised that he intends to take up a proportion of his Entitlement subject to his Voting Power not exceeding 27.65%. As the Offer is fully underwritten, it is unlikely that this Dr Kelly's Voting Power will increase as a result of the Offer.

**Elenore Goodridge has not indicated whether she will elect to take up her Entitlements. If she takes up her Entitlements, it is expected her Voting Power will remain the same. If she does not take up her Entitlements, then her Voting Power will decrease as a result of the Offer.

Accordingly, based on a fully underwritten Offer and subject to rounding, it is expected that, immediately after Completion of the Offer, the Relevant Interests of the Substantial Shareholders in Shares will be within the levels specified in the below table:

Shareholder	% Voting Power with no Entitlements taken up by the Substantial Shareholder	% Voting Power with full Entitlements taken up by the Substantial Shareholder
Milligene Pty Limited as trustee for The GE and PR Kelly Fam Trust and it associates	14.79%	20.71%
Eleanore Goodridge	4.98%	6.99%

The historical and pro-forma financial information presented above is in an abbreviated form, and does not include all of the disclosures required by AAS applicable to annual financial statements. A copy of the Company's 2019 Annual Report and its half-year report for the period ending 31 December 2019 can be obtained free of charge by contacting the Company Secretary, David Franks, on +61 2 8098 1169 from 8.00am to 6.00pm (AEST), Monday to Friday, or by email at David.Franks@automicgroup.com.au, during the Offer Period.

The above pro-forma adjusted HY20 Balance Sheet has been prepared to show the impact on

the financial position of the Company as set out in its last reviewed financial report of the following matters only:

- deconsolidation of Nyrada Inc. from the Company's consolidated financial statements from the date of Nyrada Inc.'s listing on the ASX;
- proceeds from a loan to the Company by an existing Shareholder to pay out the convertible notes in February 2020;
- proceeds from the Company's capital raise in February 2020;
- Completion of the Offer, by way of full subscription (on the basis that 60,914,458 New Shares, 25,304,819 New Options and 45,609,638 Underwriting Options are offered and issued), raising \$7,918,879, and before the expenses of the Offer; and
- expenses of the Offer (assuming full subscription of New Shares) are estimated at \$727,825 (see further Sections 5.6 and 5.9). These costs have been offset against proceeds of the Offer.

Below are further details of the various items referred to above:

- the Company's consolidated financial statements at 31 December 2019 included the assets and liabilities of Nyrada Inc. as a subsidiary entity of the Company. As a consequence of Nyrada Inc.'s listing on the ASX, the Company no longer has control of Nyrada Inc, and it has subsequently been deconsolidated from the Company's financial statements. As a result of the deconsolidation, the Company has recognised its investment in Nyrada Inc., recognised the resulting gain from the deconsolidation, the extinguishment of part of the inter-company loan and removal of any residual asset and liability balances from the consolidated financial statements;
- the Company secured a \$4.2 million loan from an existing shareholder in February 2020. The proceeds of the loan were used to pay out the balance of the convertible notes on issue. This is a short-term loan and will be repaid from the proceeds of the Company's 2020 research and development rebate when received from the Australian Taxation Office; and
- the Company raised \$3.1 million through a capital raise in February 2020.

2.7 **General terms and conditions**

(a) Eligibility to apply

The Offer in this Prospectus is being made to any Shareholder whose registered address is, as at the Record Date, situated in Australia or New Zealand.

Before making an Application for New Shares, it is the personal responsibility of each Applicant to ensure that it has complied with the applicable laws of each jurisdiction that may be relevant to its Application. By submitting an Application Form, Applicants are taken to have warranted and represented to the Company that it is not restricted by law from applying for New Securities and has observed the applicable laws of all relevant jurisdictions in making the application.

(b) Discretions regarding Applications

The lodgement of an Application with the Company (or its authorised agents) constitutes an offer by the Applicant to the Company to subscribe for up to such number of New Shares as the Application Money specified in and accompanying the Application Form will pay for, at the Offer Price and on the terms and conditions of the Offer as set out in this Prospectus (including the acknowledgments and representations in Sections 2.7(a), 2.9 and 2.11).

Applications and Application Money must be received by the Company by no later than 5.00pm (AEST) on the Closing Date, which will occur on 11 June 2020 unless varied by the Company at the discretion of the Board. You are therefore encouraged to submit your Application as early as possible.

Cooling-off rights do not apply to an investment in the New Shares offered under this Prospectus. This means that, in most circumstances, you cannot withdraw your Application once it has been accepted.

If the amount of your payment for Application Money is insufficient to pay for the total number of New Shares you have applied for, you may be taken to have applied for such lower number of New Shares as your cleared Application Money will pay for, or your Application may be rejected, at the discretion of the Board.

Applicants whose Applications are rejected, or who are allocated a lesser number of New Shares than the amount applied for, will receive a refund of all or the surplus portion of their Application Money, within the time prescribed by or otherwise permitted in accordance with the Corporations Act. Interest will not be paid on any Application Money refunded.

Pending the allotment and issue of the New Securities, or the payment of any refunds, all Application Money will be held by the Company in trust for Applicants in a separate bank account as required by the Corporations Act. By submitting an Application Form, each Applicant agrees that the Company is entitled to retain all interest that accrues on the bank account whether or not the issue of New Securities takes place, and waives its right to claim any such interest.

To the extent permitted by law, an Application is irrevocable, once submitted to the Company or any of its agents.

The Board retains its discretion not to allocate New Securities to an Applicant to the extent doing so would result in a breach of the Corporations Act or other applicable law (whether by the Applicant, the Company or otherwise), or would require regulatory approval to be obtained.

(c) Discretions regarding the Offer

The Company reserves the right to:

- extend the Offer or any part of it;
- close the Offer or any part of it early; and
- not proceed with the Offer or any part of it,

at any time before the allocation of New Securities to Applicants.

If the Offer or any part of the Offer is cancelled or withdrawn, all Application Money that is received by or on behalf of the Company, or the relevant Application Money, will be refunded within the time prescribed by or otherwise permitted in accordance with the Corporations Act.

Interest will not be paid on any Application Money refunded.

Please be aware that your financial institution may implement earlier cut-off times with regard to electronic payment than the time at which the Offer close. 2.10 **Trading of Shares and administration of Shareholdings**

(a) Trading on market

The Company will apply to ASX for Official Quotation of the New Shares and New Options on ASX, within 7 days after the date of this Prospectus.

If ASX does not grant permission for the quotation of the New Shares offered under this Prospectus within three months after the date of this Prospectus (or such longer period permitted by the Corporations Act or with the consent of ASIC), the Offer will be withdrawn and all Application Money received by or on behalf of the Company will be refunded to Applicants, without interest, within the time prescribed by or otherwise permitted in accordance with the Corporations Act.

The New Options will comprise a new class of listed security, subject to satisfying the Official Quotation conditions. If the Official Quotation conditions are not satisfied, the New Options will

remain unquoted until such time as those conditions are able to be satisfied.

A decision by ASX to grant official quotation of the New Shares or the New Options is not to be taken in any way as an indication of ASX's view as to the merits of the Company, the New Shares or the New Options. ASX and its officers do not take any responsibility for this Prospectus or the investment to which it relates.

Quotation of the New Shares and New Options issued under the Offer, if granted, is expected to commence on ASX under company code "NOX" on or about 19 June 2020, shortly after holding statements are despatched (see further Section 2.10(b)).

It is the responsibility of each Applicant to confirm their holding before trading in Shares or Options. Applicants who sell Shares or Options before they receive an initial holding statement do so at their own risk. The Company disclaims all liability, whether in negligence or otherwise, if an Applicant sells Shares before receiving a holding statement, even if the Applicant obtained details of their holding from the Company or the Share Registry.

(b) CHES and issuer sponsored holdings

The Company participates in ASX's Clearing House Electronic Sub-register System (**CHES**), in accordance with the ASX Listing Rules and the ASX Settlement Operating Rules. CHES is an electronic transfer and settlement system for transactions in securities quoted on ASX under which transfers are affected in an electronic form.

Holdings of New Shares and New Options, once issued, will be registered in one of two sub-registers, an electronic CHES sub-register or an issuer sponsored sub-register. For all Applicants, the Shares and Options of a Shareholder who is a participant in CHES or a Shareholder sponsored by a participant in CHES will be registered on the CHES sub-register. All other Shares and New Options will be registered on the issuer sponsored sub-register.

Following Completion of the Offer, successful Applicants will be sent a holding statement that sets out the number of New Shares and New Options that they have been issued. This statement will also provide details of a Shareholder's Holder Identification Number (HIN) for CHES holders or, where applicable, the Shareholder Reference Number (SRN) of issuer sponsored holders.

Shareholders will subsequently receive statements showing any changes to their shareholding. Share certificates and option certificates will not be issued.

Initial holding statements are expected to be despatched by post to relevant Applicants on or around 18 June 2020.

2.11 **Restrictions on distribution**

This Prospectus does not constitute an offer or invitation to subscribe for New Securities in any jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer, invitation or issue under this Prospectus.

Where this Prospectus has been dispatched to or accessed by persons other than Eligible Shareholders, this Prospectus is provided for information purposes only.

No action has been taken to register or qualify this Prospectus, the New Securities or the Offer, or otherwise to permit a public offering of New Securities in any jurisdiction other than Australia, although Shareholders in New Zealand may be eligible to participate in the Offer and should refer to Section 2.12 for further information. In particular, the Offer does not constitute an offer to sell, or solicitation of an offer to buy, securities in the United States. The New Securities have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold, directly or indirectly, in the United States, except in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act and applicable US state securities laws.

This Prospectus may not be released or distributed in the United States or any other jurisdiction outside of Australia, and may only be distributed to persons to whom the Offer may lawfully be

made in accordance with the laws of any applicable jurisdiction.

By submitting an Application Form, you are taken to have represented, warranted and agreed that you:

- understand that the New Securities have not been, and will not be, registered under the U.S. Securities Act or the securities laws of any state of the United States and may not be offered, sold or resold in the United States except in transactions exempt from, or not subject to, registration requirements of the U.S. Securities Act and applicable US state securities laws;
- are not in the United States;
- have not and will not send this Prospectus or any other material relating to the Offer to any person in the United States; and
- will not offer or sell the Shares in the United States or in any other jurisdiction outside of Australia except in transactions exempt from, or not subject to, registration requirements of the U.S. Securities Act and in compliance with all applicable laws in the jurisdiction which Shares and Options are offered and sold.

2.12 **Overseas Shareholders**

The Offer in this Prospectus is not being extended to any Shareholder whose registered address is not, as at the Record Date, situated in Australia or New Zealand.

Recipients must not send or otherwise distribute this Prospectus or the Application Form to any person outside Australia (other than to Eligible Shareholders).

It is the responsibility of any Shareholder who submits an Application Form to obtain all necessary approvals for the allotment and issue of the New Securities under this Offer. The return of a completed Application Form will be taken by the Company to constitute a representation and warranty by the applicant to the Company that there has been no breach of such laws and that all relevant approvals have been obtained.

New Zealand Shareholders

The New Securities are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the Financial Markets Conduct Act 2013 and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2016.

This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This Prospectus is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

Persons resident outside Australia should consult their professional advisers as to whether any governmental or other consents are required, or whether formalities need to be observed, to enable them to accept the offer of New Securities under this Prospectus.

Given the relatively small number of Shareholders outside Australia and New Zealand, it is not reasonable for the Company to meet the requirements of the securities laws of countries other than Australia and New Zealand and the Offer has not been, and will not be, registered under the relevant securities laws of those jurisdictions. For that reason, no Application Forms can be or are being sent to Shareholders with registered addresses outside Australia and New Zealand, and this Prospectus is being sent to them for information purposes only.

2.13 **Beneficial holders, nominees, trustees and custodians**

Nominees and custodians should not that the Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a

nominee or the identity or residence of any beneficial owners of securities. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with the beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

2.14 **Brokerage, commission and stamp duty**

No brokerage, commission or stamp duty is payable by Applicants on the acquisition of New Securities under the Offer.

2.15 **Tax consequences**

As with any investment, there may be taxation implications associated with you applying for New Securities. 3. Company Update

3.1 Transaction-specific prospectus and continuous disclosure obligations

The Company is a disclosing entity (as defined in section 111AC of the Corporations Act) and is therefore subject to regular reporting and disclosure obligations. Under those obligations, the Company is required to comply with all applicable continuous disclosure and reporting requirements in the Corporations Act and the ASX Listing Rules. In particular, the Company must comply with the requirement to disclose to ASX any information held by the Company which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the 3 months prior to the date of the prospectus (or options to acquire those securities). In general terms, "transaction specific prospectuses" are only required to contain information in relation to the effect of the Offer on the Company and the rights and liabilities attaching to the securities offered. It is not required to provide information regarding the Company's assets and liabilities, financial position and performance, profits and losses or prospects on the basis that, as at the date of this Prospectus, the Company has not withheld from its continuous disclosure reporting any information about such matters that investors and their professional advisers would reasonably require to make an informed assessment of such matters and expect to find in this Prospectus.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Generally, information that is already in the public domain has not been reported in this Prospectus other than to the extent considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act, confirms that:

- it is subject to regular reporting and disclosure obligations;
- copies of documents lodged with ASIC in relation to the Company may be obtained from, or inspected at, the offices of ASIC; and
- it will provide a copy of each of the following documents, free of charge, to any person on request provided the Company receives the request before the close of the Offer:
 - the annual financial report most recently lodged by the Company with ASIC, namely, its 2019 Annual Report;
 - any half-year financial report lodged with ASIC after lodgement of the 2019 Annual Report and before lodgement of this Prospectus with ASIC; and
 - any continuous disclosure notices given by the Company after the lodgement of the 2019 Annual Report and before the lodgement of this Prospectus with ASIC.

Having taken such precautions and having made such inquiries as are reasonable, the Directors believe that the Company has complied with the general and specific disclosure and notification requirements of ASX throughout the period from the date of lodgement of the Company's 2019 Annual Report with ASIC to the date of this Prospectus.

4. Risk Factors

4.1 Introduction

This Section describes some of the potential risks associated with investing in the Company and in New Securities. The Company is subject to risks that are specific to the Company and its business. There are also risks that are associated with external events unrelated to the usual course of the business, or risks that are common to all investments in shares and not specific to an investment in the Company

If any of these risks were to occur, the future operating and financial performance and prospects of the Company could be materially and adversely affected and you could lose part or all of your investment in the Company. Whilst some of the risk factors may be mitigated by appropriate commercial action, many are either wholly or in part outside of the control of the Company, the Directors and management. The New Securities being offered carry no guarantee as to maintenance of or appreciation in value, the payment of dividends or return of capital. Further, there can be no guarantee that the Company will achieve its stated objectives or that any forward-looking statement will eventuate.

Please note that this Section does not purport to list every risk that may be associated with an investment in the Shares or the New Options, whether now or in the future. The risks highlighted in this Section have been selected based on an assessment of the key risks that the management and the Directors would focus on when managing the Business, the probability of the risk occurring as well the significance of the impact on the Company if the relevant risk did occur. The assessment is based on the knowledge of the Directors as at the date of this Offer, but there is no guarantee or assurance that the importance of risks will not change or other risks will not emerge. Further, your individual financial objectives, financial situation and particular needs have not been taken into account in the preparation of this Section.

Before applying for New Shares, you should satisfy yourself that you have a sufficient understanding of the inherent risks of investing in the company and becoming a shareholder of a company, including the risks described in this Section. You should consider whether New Securities are a suitable investment for you having regard to your personal investment objectives, financial circumstances and taxation position. If you do not understand any part of this Prospectus, or are in any doubt as to whether or not to invest in New Securities, the Directors strongly recommend that you seek professional guidance from your accountant, financial adviser, stockbroker, lawyer, tax adviser or other independent and qualified professional adviser before deciding whether to invest.

4.2 Risks specific to an investment in the Company

(a) Uncertainty of clinical development

The Company's ability to commercialise its intellectual property is reliant on its ability to generate clinical data, starting with gaining the necessary approvals to conduct clinical trials. There are numerous regulatory issues to pass before agencies (such as the Food and Drug Administration in the USA, the European Medicines Agency in the European Union and the Therapeutic Goods Administration in Australia) might be prepared to grant permission for a drug candidate to undergo human studies. Further, there is no certainty that any of the drug candidates will ever receive that permission.

Drug development is a highly risky business with a high failure rate. There are numerous reasons for this, mainly relating to low therapeutic benefit and unacceptable toxicity, with the drug's pre-clinical data failing to predict those adverse outcomes. While the Company will conduct its clinical programs on the advice of consultants experienced in clinical trial design and regulatory affairs, there is no certainty that the trial design will provide appropriate data or that the data will meet the regulator's benchmark. This may require the Company to conduct further clinical studies, resulting in significant additional cost and delay.

Once a drug enters the clinic, the final drug development path typically takes 8-10 years, depending on the indication.

(b) Commercialisation

The Company's current business strategy is to focus on drug discovery and to develop each asset to a stage of value determination leading to a commercial realisation. Typically that will be a trade sale or license of individual drug candidates to a third party with greater resources and expertise to undertake late-stage drug development, regulatory approvals, and sales and marketing. There is no certainty that any of the Company's drug candidates will be of interest to such a third party or, if a drug candidate is of interest to such a third party, that terms can be negotiated that are commercially acceptable to the Company or will adequately realise the value of the drug candidate.

(c) Additional capital requirements

Pharmaceutical R&D activities require a high level of funding over a protracted period of time. Notwithstanding the money raised under the Offer, additional development costs may arise during this period and the Company may require additional funding to meet its stated objectives or may decide to accelerate or diversify its activities within the same area.

The Company's requirement for additional capital may be substantial and will depend on many factors, some of which are beyond the Company's control, including:

- slower than anticipated research progress;
- the requirement to undertake additional research;
- competing technological and market developments;
- the cost of protecting the Company's intellectual property; and
- progress with commercialisation of any of the Company's drug candidates.

The Company will constantly evaluate data arising from its pre-clinical and clinical studies that may indicate new uses for its products and allow the Company to file patents, thereby providing potential new development and partnering opportunities. Accordingly, the Company may alter its funding strategies to take advantage of such new opportunities if and when they present themselves.

There is no assurance that the funding required by the Company from time to time to meet its business requirements and objectives will be available to it, on favourable terms or at all. To the extent available, any additional equity financing may dilute existing Shareholdings and any debt financing may involve restrictions on the Company's financing and operating activities.

If the Company is unsuccessful in obtaining funds when required, it may be necessary for it to reduce the scope of its operations. Any of these consequences may significantly and adversely impact the value of the Company, the Shares and the New Options.

(d) Trade secrets

The Company relies on its trade secrets, including information relating to the manufacture, development and administration of its drug candidates. The protective measures employed by the Company may not provide adequate protection for its trade secrets. This may erode the Company's competitive advantage and materially harm its business. Further, the Company cannot be certain that others will not independently develop the same or similar technologies on their own or gain access to trade secrets.

(e) Intellectual property rights

Obtaining, securing and maintaining the Company's intellectual property rights is an integral part of securing potential value arising from conduct of the Company's business. If patents are not granted, or if granted only for limited claims, the Company's intellectual property may not be adequately protected and may be able to be copied or reproduced by third parties. The Company may not be able to achieve its objectives, to commercialise its products or to generate revenue or other returns.

The patent position of biotechnology and pharmaceutical companies can be highly uncertain and frequently involves complex legal and factual questions. Accordingly, there can be no guarantee that the provisional patent applications will be successful and lead to granted patents or all of the claims in any application will be granted. Furthermore, should such applications be granted, there is no guarantee competitors will not develop technology to avoid those patents, or that third parties will not seek to claim an interest in the intellectual property with a view to seeking a commercial benefit from the Company. The Company has engaged patent attorneys to develop and implement an intellectual property strategy to seek to establish broad patent protection to enable it to guard its exclusivity, maintain an advantage over competitors and provide it with a basis for enforcement in the event of infringement, but there is no guarantee that this intellectual property strategy will be successful.

There also can be no assurance employees, consultants or third parties will not breach their confidentiality obligations or not infringe or misappropriate the Company's intellectual property. The Company seeks to mitigate the risk of unauthorised use of its intellectual property by limiting disclosure of sensitive material to particular employees, consultants and others on a need to know basis. Where appropriate, parties having potential access to such sensitive material will be required to provide written commitments to confidentiality and ownership of intellectual property.

(f) Third party intellectual property infringement claims

The Company's success depends, in part, on its ability to enforce and defend its intellectual property against third party challengers. The Company believes that the manner in which it proposes to conduct activities will minimise the risk of infringement upon another party's patent rights. However, there can be no assurance that another party will not seek to claim the Company is infringing upon their rights.

While the Company relies on the advice of its patent attorneys that its patent applications do not infringe third party patents, the Company is unable to state with certainty that another party will not claim its rights are infringed or, if litigation claiming that the Company is infringing the intellectual property rights of a third party is launched, what the result of any such litigation will be. While the Company is pursuing clinical development and commercialisation strategies that it believes will minimise the risk of patent infringement, there can be no certainty that there will not be action taken against the Company, although the Company is prepared to defend its position in a forthright manner if required. Further, there can be no guarantee that competitors will not seek to claim an interest in the intellectual property with a view to seeking a commercial benefit from the Company.

If a third party claims that the Company is infringing its intellectual property rights or commences litigation against the Company for infringement of patent or other intellectual property rights, the Company may incur significant costs defending such action, whether or not it ultimately prevails. Patent litigation in the pharmaceutical and biotechnology industry is typically expensive and any defence against any such action necessarily will divert the time of the Company's Directors and other key personnel. This may, in turn, have a materially adverse effect on both the financial performance and future prospects of the Company.

(g) Dependence on key personnel

The Company is dependent on the principal members of its scientific and development team, the loss of whose services could materially adversely affect the Company and may impede the achievement of its research and development objectives. Given the nature of the Company's activities, its ability to maintain its program is dependent on its ability to attract and maintain appropriately qualified personnel either within the Company or through contractual arrangements.

If one or more of the Company's key personnel was unwilling or unable to continue in their current roles, there is a risk that the Company may be unable to recruit a suitable replacement on commercially acceptable terms or at all. The loss of any key personnel, without suitable and timely replacement, may significantly disrupt the operations of the Company's business and impede the Company's ability to implement its business plans. This may, in turn, have a materially adverse effect on both the financial performance and future prospects of the Company. The Company may also incur significant costs in recruiting and retaining new key personnel.

Further, the Company's current size affects its ability to provide substantial training and development opportunities to its key managers and personnel. Extensive ongoing development opportunities are not feasible for a small biotechnology company such as Noxopharm. The Company has sought to address this risk by hiring sufficiently qualified and skilled management and scientific development staff.

4.3 **General risks**

(a) Coronavirus disease

The outbreak of coronavirus disease (COVID-19) is starting to have an effect on global economic markets. The Directors are monitoring the situation closely, have considered the impact on the Company's business and financial performance and presently do not consider there to be a material adverse impact. However, such effects are creating risks for the Company and could effect general economic conditions in the short to medium term.

(b) Macro-economic risks

Changes in the general economic conditions in Australia and globally are outside of the control of the Company, but may have a significant impact on the future performance of the Company and the price or value of the Shares and/or the New Options. Such changes may include:

- general down-turn in investor confidence affecting the ability of the Company to raise additional funds;
- fluctuations in interest rates, exchange rates, commodity prices and the rate of inflation in Australia resulting from domestic or international conditions (including movements in domestic interest rates and reduced activity in the Australian economy);
- changes in government, legislation, government policy or the regulatory environment in which the Company operates;
- changes in Australian and global equity market conditions;
- changes in investor sentiment toward particular market sectors;
- acts of terrorism or other hostilities; and
- the occurrence of natural disasters.

A prolonged deterioration in any number of the above factors may have a material adverse effect on the financial performance, financial position, cash flows, distributions and growth prospects of the Company and the price or value of the Shares and/or the New Options.

(c) Regulation changes

Changes to the laws, regulations, standards and practices applicable to the industry in which the Company operates (for example, drug approval regulations and government R&D rebates) may increase costs and limit the Company's proposed scope of activity.

(d) Taxation

Relevant tax laws and treaties and their interpretation and applicability change from time to time. There is the risk that these changes could adversely and materially affect the Company's profitability and prospects.

(e) Litigation, claims and disputes

The Company may be subject to litigation and other claims and disputes in the course of its business, including contractual disputes with suppliers or customers, employment disputes, indemnity claims, and occupational and other claims. There is a risk that any such litigation, claim or dispute could materially adversely impact the Company's operating and financial performance due to the significant cost and time invested by management in investigating,

commencing, defending and/or settling such matters. Any claim against the Company, if proven, may also have a sustained negative impact on its operations, financial performance, financial position and reputation.

The Company is not currently engaged in litigation and, as at the date of this Prospectus, the Directors are not aware of any legal proceedings pending or threatened against, or any material legal proceedings affecting, the Company.

4.4 **Risks associated with holding Shares and Options**

(a) Stock market risks

There are risks associated with any investment in securities.

In particular, there is a risk that the price at which Shares trade on ASX may be less than the Offer Price payable under this Offer. While fluctuations in the price of the Shares and the New Options may be a direct reflection of changes in the financial performance of the Company, the market price of the Shares and New Options may also be affected by factors unrelated to the operating performance of the Company and the demand for and supply of capital generally.

(b) Liquidity of New Options

There can be no guarantee however that an active market in the New Options will develop or that the price of the New Options will increase after Completion of the Offer. There may be relatively few buyers or sellers of the New Options on ASX at any given time, which may in turn affect the prevailing market price at which the New Options are able to be sold and generally increase the volatility of the market price of the New Options.

(c) Risk of dilution

The Company may issue Shares (and/or Options) from time to time to raise additional capital to finance its continued growth or other future developments. The amount and timing of such additional financing needs will vary primarily on the amount of cash flow from the Company's operations. While the Company will be subject to the constraints of the ASX Listing Rules regarding the percentage of its capital that it is able to issue within any 12 month period (other than where exceptions apply), there is a risk that the issue of additional equity will result in the ownership interest of Shareholders in the Company from time to time being diluted.

(d) No guarantee of dividends

The prospect of future dividends being paid or made to Shareholders will be contingent upon the Company's ability to generate sustainable profits. To the extent that the Company pays any dividends, the ability to offer fully franked dividends will depend on the Company making taxable profits and paying sufficient Australian tax to attach franking credits to the dividends. Taxable profits may be volatile, making the payment of fully franked dividends unpredictable. Further, the value and availability of franking credits to a Shareholder will differ depending on the Shareholder's particular tax circumstances. You should be aware that the ability to use franking credits, either as a tax offset or to claim a refund after the end of the income year, will depend on your individual tax position.

As such, no assurance can be given by any person, including the Board, about the payment or the quantum of future dividends (if any), or the level of franking or imputation of any such dividend (if any).

(e) Tax considerations

An investment in Shares and New Options involves tax considerations which may differ for each Shareholder. You are encouraged to obtain professional tax advice in connection with any investment in Shares and New Options.

4.5 **Investment is speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the

Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Securities offered under this Prospectus. Therefore, the New Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities.

Eligible Shareholders should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for securities pursuant to this Prospectus.

5. Additional Information

5.1 Rights and liabilities attaching to Shares

The rights and liabilities attaching to ownership of the New Shares offered under this Prospectus (being fully paid ordinary shares in the Company) are:

- detailed in the Company's Constitution, which may be inspected during normal business hours at the registered office of the Company; and
- in certain circumstances, regulated by the Corporations Act, the ASX Listing Rules, the ASX Settlement Operating Rules (collectively, **Applicable Law**) and the general law.

A summary of the material provisions of the Constitution, including those relating to certain significant rights, liabilities and obligations attaching to the Shares, are set out below.

This summary is not intended to be exhaustive and is qualified by the fuller terms of the Constitution. Please be aware that the following summary does not constitute a definitive statement of the rights and liabilities of Shareholders.

5.2 General meetings

Each Shareholder is entitled to receive notice of and be present to vote and speak at general meetings of the Company.

At a general meeting, each Shareholder present (in person or by proxy, attorney or representative) has one vote on a show of hands. On a poll, each Shareholder present (in person or by proxy, attorney or representative) has one vote per Share. This is subject to any other rights or restrictions that may be attached to any Shares. If a Share is held jointly, only the vote of the Shareholder whose name appears first in the register of Shareholders will be counted.

The Company must give Shareholders at least 28 days' prior notice in writing of a general meeting.

Shareholders may requisition meetings in accordance with the Corporations Act.

5.2.1 Dividends

Subject to the Corporations Act, the Constitution and the terms of issue or rights of any shares with special rights to dividends, each holder of a Share will participate in all dividends declared after their issue. The Board may determine that a dividend is payable by the Company and fix the amount, the time for payment and the method of payment.

The Board may resolve that a dividend (interim or final) will be paid wholly or partly by the transfer or distribution of specific assets, including fully paid shares in, or debentures of, any other corporation.

5.2.2 Election to accept Shares in lieu of dividend

To the extent authorised by the Company in general meeting, the Board may Resolve, in respect of any dividend which it is proposed to pay on any Shares, that Shareholders may elect to forgo their right to share in the proposed dividend or part of the proposed dividend and instead receive an issue of Shares credited as fully paid.

5.2.3 Rights on winding up

If the Company is wound up, subject to any special terms and conditions attached to any shares, any surplus must be divided among the Shareholders in the proportion to the Shares held by

them respectively, subject only to any amounts unpaid on the Shares. The liquidator may, with the sanction of a Special Resolution of Shareholders, divide among the Shareholders in kind all or any part of the Company's property, and for that purpose, determine how it will carry out the division as between the Shareholders.

5.2.4 Forfeiture

At present, the only class of shares on issue in the capital of the Company is fully paid ordinary shares, they are not subject to any calls for money by the Board and will therefore not become liable for forfeiture.

5.2.5 Transferring Shares

Subject to the Constitution and any restrictions attached to a Share, the Shares are generally freely transferrable subject to meeting certain formal requirements. A Shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system conducted in accordance with the Applicable Law for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by the Board, ASX or other usual or common form.

The Company must refuse to register a transfer of Shares only in certain specified circumstances, such as when it is required to do so by Applicable Law or where the transfer would be contrary to the terms of an ASX-imposed restriction agreement or escrow agreement.

5.2.6 Future changes in capital

Subject to Applicable Law, the Constitution and any rights and restrictions attached to a class of shares, the Company may, by resolution of the Board, issue shares (including preference shares) or grant options to acquire shares, at any time, for any consideration and with such preferred, deferred or other special rights or restrictions as the Board considers appropriate.

Subject to the ASX Listing Rules, the issue of shares, options or other securities is not required to be ratified by Shareholders in general meeting.

The Company may consolidate and divide its share capital or reduce its share capital and buy back its Shares, in any manner provided by Applicable Law.

5.2.7 Variation of class rights

As noted above, the only class of shares on issue in the capital of the Company currently is fully paid ordinary shares. Subject to the Corporations Act and the terms of issue of shares in a particular class, the Company may vary or cancel the rights attached to shares in that class:

- by Special Resolution passed at a meeting of the holders of shares of that class; or
- with the written consent of the holders of three quarters of the issued shares in that class.

In either case, in accordance with the Corporations Act, the holders of not less than 10% of the votes in the class of shares, the rights of which have been varied or cancelled, may apply to a court of competent jurisdiction to exercise its discretion to set aside such a variation or cancellation.

5.2.8 Sale of non-marketable parcels

Subject to the Applicable Law, the Company may sell the Shares of a Shareholder if the total number of Shares held by that Shareholder is less than a marketable parcel at the date specified in a written notice given by the Company to that Shareholder (which must be not less than six weeks after the date on which the written notice is sent to that Shareholder), unless that Shareholder advises the Company in writing by the date specified in the written notice that it wishes to be exempted from this arrangement or that it has purchased sufficient additional Shares so as to increase its holding to at least a marketable parcel.

5.2.9 Proportional takeover

The Constitution contains provisions that require Shareholder approval to be obtained in relation to any proportional takeover bid made for the Company's Shares. These provisions will cease to apply on the third anniversary of their date of adoption or last renewal, unless renewed in accordance with the Corporations Act.

5.2.10 Appointment and removal of directors

The number of directors (not including alternate directors) of the Company is to be no less than 3 and not more than 12, unless determined otherwise by an Ordinary Resolution of Shareholders.

The Company may, from time to time, by Ordinary Resolution remove a director from office or appoint any additional directors. The Company must accept nominations from Shareholders for the election of directors proposed by at least 50 Shareholders or Shareholders between them holding at least 5% of the votes that may be cast up to 30 business days before the general meeting at which the candidates are to be elected.

The Board may also appoint a director, either to fill a casual vacancy or as an addition to the existing directors. A director so appointed (excluding the managing director) will hold office only until the end of the next annual general meeting, and will be eligible for re-election by Shareholders at that meeting.

Retirement will occur on a rotational basis so that a director (excluding the managing director or a director appointed to fill a casual vacancy) must retire from office by no later than either the third annual general meeting of the Company following, or three years after, that Director's last election or appointment, whichever is the later. If no director would otherwise be required to retire in the foregoing circumstances but the ASX Listing Rules require that an election of directors be held at an annual general meeting, the director to retire is the director who has held office for the longest period of time since his or her last election. Retiring directors are eligible for re-election at the meeting at which their retirement is confirmed.

5.2.11 Variation of the Constitution

The Constitution can only be amended by Special Resolution of Shareholders passed at a general meeting.

5.3 **Terms of New Options**

The New Options entitle the holder (**Optionholder**) to subscribe for fully paid ordinary shares in the capital of the Company on the following terms and conditions:

- (a) Subject to (k), each Option gives the Optionholder the right to subscribe for one fully paid Share.
- (b) The New Options will expire at 5.00pm (Sydney time) on the date which is 3 years after the date of issue of the New Options (**Expiry Date**). Any New Options not exercised before the Expiry Date will automatically lapse on the Expiry Date.
- (c) The amount payable upon exercise of each Option will be \$0.30 (**Exercise Price**).
- (d) The New Options held by the Optionholder may be exercised in whole or in part, and if exercised in part, multiples of 1,000 must be exercised on each occasion.
- (e) An Optionholder may exercise their New Options by lodging with the Company, before the Expiry Date:
 - (i) a written notice of exercise of New Options specifying the number of New Options being exercised; and

- (h) All Shares allotted upon the exercise of the New Options will upon allotment rank pari passu in all respects with other Shares. The Company will apply for quotation of all Shares allotted pursuant to the exercise of New Options on ASX within 2 Business Days after the date of allotment of those Shares.
- (i) The New Options are transferable.
- (j) The Company will apply for quotation of the New Options on ASX.
- (k) If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction
- (l) There are no participating rights or entitlements inherent to the New Options and the Optionholders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the New Options. However, the Company will ensure that for the purposes of determining the entitlements to any such issue, the record date will be at least 3 Business Days after the issue is announced. This will give Optionholders the opportunity to exercise their New Options prior to the date for determining entitlements to participate in any such issue
- (m) Subject to clause (k), an Option does not confer the right to a change in exercise price or a change in the number of underlying securities over which the Option can be exercised.

In accordance with the underwriting agreement dated on or about 13 May 2020 between the Company and the Underwriter (**Underwriting Agreement**), the Underwriter has agreed to conditionally underwrite 60,914,458 New Shares at the Offer Price and 20,304,819 New Options the subject of the Offer.
